BELGICA:

PhD student

The VIB Department of Molecular Genetics is one of 8 research departments of VIB (<http://www.vib.be/VIB/EN/>). With near 100 researchers working in 4 research groups, the department aims to understand the complex nature of neurological and psychiatric human diseases (<http://www.molgen.ua.ac.be/>). The department disposes over the expertise of centralized service facilities like the Genetic Service Facility and the Diagnostic Service Facility, as well as central units with expert knowledge in functional genomics, technology development and bio-informatics. The VIB Department of Molecular Genetics is located at the University of Antwerp (<http://www.ua.ac.be/>), and is affiliated with the Institute Born-Bunge, a research institute with a track record in clinical neurological and pathological research into CNS and PNS diseases (http://www.bornbunge.be/Home/index_nl.shtml), and to the faculty department of Biomedical Sciences of the Faculty of Pharmaceutical, Biomedical and Veterinarian Sciences. Candidate profile: • Motivated students of all nationalities with a strong commitment to basic and/or clinical research. • Holder of a MSc in medical or biomedical sciences. Candidates with a master degree in biosciences (biochemistry, biotechnology, biology) might also be considered if expertise in a life science discipline can be demonstrated. • Fluent in English (spoken and written language). • Any experience in genetics, genomics or molecular cell biology is an advantage. • The candidate should have well-developed social skills directed to working in a team. Application: • If you are interested in this position, mail a letter of interest, curriculum vitae (including a list of publications) and the names of 2-3 reference persons to phd@molgen.vib-ua.be .

FUNCTIONAL ANALYST (H/F)

For one of our clients based in Brussels, we are looking for 2 Functional Analysts. Tasks and responsibilities of the job will include, amongst others : -Analyse and match the functional needs to the end users, considering possibilities/technical limitations, budget/timing/scope of the existing architecture. -Coordinate projects either to introduce new systems or applications, or to guarantee the continuity of existing systems or applications. -Work out, organise and carry out integration functional tests, as well as launch, follow and validate users tests to see if the developed application meet the initially fixed requirements. -Send, supervise and follow the technical designers and the application developers, during the technical analysis, the development and test phases. **Eureka@-ITS Information: Karlien GLADINE Address: Rue de l'Industrie 1 4823 Rodange Email: jobs@eureka-its.com**

DINAMARCA:

Bachelor's Degree in Global Nutrition and Health: Associate professor with expertise in Global Nutrition and Health

The Bachelor's Degree in Global Nutrition and Health, Metropolitan University College, situated in the heart of Copenhagen, five minutes' walk from Nørreport train station, is looking for an associate professors to teach in Public health

Nutrition, Health Promotion, and Nutritional Science in an International Perspective and to take part in developing the programme. The position is a permanent positions starting from July 1st 2010. The Bachelor's Degree in Global Nutrition and Health is a 3½ year higher education programme taught in English. The programme consists of a foundation year and two specialisations: 'Lifestyle Coaching & Fitness Management' and 'Public Health Nutrition & Food Policy'. Approximately 210 students from 27 different nations follow the programme; the first students graduated in January 2010. The programme is designated as a WHO Collaborating Centre for Nutrition. Besides teaching there is a number of challenging tasks to be taken hold of such as revising the curriculum, meeting the requirements for accreditation from the Danish Ministry of Education, providing national and international work placements, developing national and international partnerships and creating a basis for collaboration with organizations, institutes, and companies within the public and private sector. The Bachelor's Degree in Global Nutrition and Health is looking for a proactive, enthusiastic and flexible candidate who is dedicated for teaching and students learning, and who is able to contribute strengthening the pedagogical and the multicultural competences within the team. Besides having specific knowledge within public health nutrition, global nutrition and intervention mapping the candidate must have competences to:

- Transfer academic knowledge into teaching in multicultural classrooms with students from many different nationalities; the majority of the international students come from South East Asia

- Teach in English
- Supervise and mark exams and assignments including bachelor projects
- Take part in developing teaching and education in general as well as within one's main field
- Establish global partnerships aimed at providing work placements for students
- Collaborate and work within an international team

Prerequisites for getting a job are candidates having:

- Minimum a relevant M.Sc. or a PhD
- Significant practical and theoretical insight in teaching and education
- Intercultural competences and experiences from working in an international environment
- Excellent command of English

Application (in English) should be sent to below link. The application must include the following:

- Cover letter including motivation for applying, highlight of relevant competences
- Curriculum Vitae (CV)
- Copies of relevant degrees

Applications which do not include the above will not be considered.

Interviews will take place on Friday June 18th and Tuesday June 29th 2010. If you have any questions, please contact Head of the bachelor in Global Nutrition and Health Hanne Gillett on 7248 7863.

The Metropolitan University College is committed to a policy of equal opportunities. We respect and value cultural and religious diversity and will not discriminate on the basis of age, gender, sexual orientation, race, ethnic origin, religion, culture or disability. Each applicant is assessed on merit alone. <https://phmetropol.easycruit.com/vacancy/420114/62827>

FINLANDIA:

Spanish language teacher Eures reference:7446224 + 7446207

To whom it may concern We are looking for someone to fill the post of part-time Spanish teacher in Kuusankoski / Kouvola. Our courses are tailor-made. Therefore those chosen must be able to identify the specific needs of their students and be creative in developing a course to meet those particular needs. He or she must be quite independent - able to find or write their own materials and program, though some guidance can be given from our office. The chosen teacher will be training Finnish business people who do business abroad. **We are looking for mother-tongue speakers of Spanish.** A knowledge of Finnish is also useful. Applications from Finnish Spanish teachers are also acceptable but only those with excellent Spanish language skills and who have Spanish teaching experience. Applicants must be experienced in language teaching, preferably with adults and be residents of the Kuusankoski / Kouvola area (there will not be enough hours to justify moving to Kuusankoski / Kouvola from other locations). We are also looking for Swedish, Chinese and German language teachers in this area so feel free to pass this ad on to anyone interested.

Please contact us by e-mail (send CV) by June 3, 2010 or sooner if possible. **Todd Proctor Manager of C.C.**

Application Specialist (s) in Document Mgmt, ECHA

The European Chemicals Agency (ECHA) was created to improve the protection of human health and the environment whilst enhancing competitiveness and innovation. It is a modern and fast growing regulatory agency of the European Union. ECHA is now looking for the most talented candidates from each European Union Member State or country of the European Economic Area (Norway, Iceland, Liechtenstein) for the following position: Application Specialist(s) in Document Management 1. THE JOB ECHA is organising the current call for expressions of interest, based on qualifications, interview and written tests, to constitute a reserve list for the post of Application Specialists in the field of Document Management. The persons to be recruited will work in one of the IT-related Units of the Agency as an Application Specialist on activities relating to the Enterprise Content Management (ECM) Programme. This agency-wide programme was launched in 2009 and it aims to transform ECHA's Enterprise Content Management capabilities over the next few years. The programme includes several strategic projects for developing case management and associated workflows related to regulatory business processes both for ECHA internal staff and for ECHA external stakeholders. ECHA is using content and document management solutions based on EMC Documentum tools. Application Specialists report to the Head of the respective Unit, and they will be responsible for some of the following tasks, depending on their individual profile, qualification and experience: -Participate to projects in ECHA content management programme; -Plan, build and operate content management systems together with other Application Specialists, System Engineers, and Architects; -Promote knowledge transfer (e.g. assist with application specific technical trainings); -Prepare documentation for application related procedures and processes; -Write and maintain system documentation; -Assess and implement compliance with applicable IT and security policies, architectural and other standards, and technical controls; -Participate to quality assurance and testing activities; -Support and assist colleagues with overall technical knowledge about content management; -Lead change management process and analyse change requests; -Analyse, diagnose, and troubleshoot issues in the ECM context; -Provide 2nd-level user support; -Contribute to procurement and consultant selection activities; -Contribute to management reporting, budget and work planning. In a more business-oriented role, the Application Specialist will: -Design, develop, configure, and maintain ECM systems; -Work with business analysts and system users to prepare system specifications; - Work with architects and vendors on the information and solution architecture in order to design and develop ECHA's content management environment; - Support system integration and data migration. In a more technical support role, the Application Specialist will: - Administer, monitor, and operate ECM environments; -Design, install, test, and configure ECM system environments; - Conduct performance analysis and optimisation of ECM systems; -Consult with the vendor and other third-party support staff on installation, configuration and maintenance of ECM and the associated infrastructure. Please indicate in your application which role you see as closer to your profile, background, and interests. 2. FORMAL REQUIREMENTS You must fulfil the requirements set out below. 2.1. General conditions -Be a national of a Member State of the European Union or a national of the European Economic Area (Norway, Iceland, Liechtenstein); -Enjoy your full rights as a citizen; -Have fulfilled any obligations imposed by the laws concerning military service; -Produce the appropriate character references as to your suitability for the performance of your duties; -Be physically fit to perform your duties; -Have a thorough knowledge of one of the languages of the European Union and a satisfactory knowledge of another language to the extent necessary to perform your duties. 2.2. Qualifications a)Successful completion of a full course of university studies in IT or related subject attested by a degree, where the normal duration of university education is four (4) years or more; Or b)Successful completion of a full course of university studies in IT or related subject attested by a degree, where the normal duration of university education is three (3) years. 2.3 Experience To qualify for this profile (AD7), you must have at the closing date for applications total professional experience of at least six (6) years (if you have a four-year degree) or seven (7) years (if you have a three-year degree). Of your total professional experience at least three (3) years must be with the development and/or support of enterprise content management applications. The deadline for filling in the application form and submit the ECHA CV is 9 June 2010 at noon 12:00 Helsinki time (11:00 a.m. CET) ECHA is an equal opportunities employer. For more details on the job profiles, formal requirements, selection criteria and application procedure, please consult our job opportunities on the ECHA website: <http://www.echa.europa.eu> Temporary Agent (M/F) Application Specialist(s) in Document Management M/F AD7 Reference Number: ECHA/TA/2010/011 Location: Helsinki, Finland

Audiovisual Technician, ECHA Hki

The European Chemicals Agency (ECHA) was created to improve the protection of human health and the environment whilst enhancing competitiveness and innovation. It is a modern and fast growing regulatory agency of the European Union. ECHA is now looking for the most talented candidates from each European Union Member State or country of the European Economic Area (Norway, Iceland, Liechtenstein) for the following position: -Audiovisual Technician-Contract Agent M/F FG III 1. JOB DESCRIPTION Audiovisual Technician will be dealing with the technical and operational matters related to the Agency's audiovisual equipment and systems and, in particular, the Bosch DCN audiovisual conference system and Crestron control logic systems installed in the ECHA Conference Centre. In addition, the Audiovisual Technician will be responsible for one or more of the following tasks: -Ensuring the technical functionality of the Agency's audiovisual equipment as well as the infrastructure; -Identifying audiovisual-related maintenance and repair needs, taking the required action and proposing improvements; -Providing technical and practical support for the organised meetings and conferences (including video conferences and web conferences); - Providing technical and practical support for supplementary video-recording of meetings or other events; -Training of users of audiovisual equipment; -Acting as an on-duty technician in the Conference Centre control room during meetings; -Acting as a technical expert in the Corporate Services Unit in the fields assigned; -Creating, updating and maintaining technical manuals and system descriptions; -Performing other assigned duties. 2. FORMAL REQUIREMENTS You must fulfil the requirements set out below. 2.1. General conditions -Be a national of a Member

State of the European Union or a national of the European Economic Area (EEA: Norway, Iceland and Liechtenstein); - Enjoy your full rights as a citizen; - Have fulfilled any obligations imposed by the laws concerning military service, - Produce the appropriate character references as to your suitability for the performance of your duties; - Be physically fit to perform your duties; - Have a thorough knowledge of one of the official languages of the European Union and a satisfactory knowledge of another official language of the European Union to the extent necessary for the performance of your duties. As the predominant language of internal communication in the Agency is English, ability to communicate in that language is an assessment criterion in all profiles. Finnish language would be an asset in order to be able to communicate with external service providers, read manuals and other written material in Finnish. 2.2. Qualifications and professional experience a) Successful completion of post-secondary level education attested by a diploma in an audiovisual/media technology; Or b) Successful completion of secondary education in an audiovisual/media technology giving access to post-secondary education and appropriate professional experience of at least three (3) years. Only qualifications issued by EU Member State authorities or EEA authorities and qualifications recognized as equivalent by the relevant EU or EEA Member State authorities will be accepted. The deadline for filling in the application form and submit the ECHA CV is 9 June 2010 at noon 12:00 Helsinki time (11:00 a.m. CET) ECHA is an equal opportunities employer. For more details on the job profiles, formal requirements, selection criteria and application procedure, please consult our job opportunities on the ECHA website: <http://www.echa.europa.eu> Contract Agent (M/F) Audiovisual Technician M/F FGIII Reference Number: ECHA/CA/III/2010/003 Location: Helsinki, Finland

SOFTWARE ENGINEER

Controllab Products is an engineering company specialized in the development of technical software. Our main product *20-sim* is a package for modeling and simulation of dynamic systems. Our customers use 20-sim for the development of mechatronic system and control engineering. For our team of software engineers working on 20-sim, we need extra help of a software engineer. As a member of the 20-sim team, you will work on the development of the robotics toolbox. This toolbox is being used by laboratories and companies for the development of new robotics applications. Therefore you must have experience in C++ programming. You also must have sufficient knowledge of mathematics to work with 3D dynamics. Together with a deep knowledge of control engineering and robotics, this will make fit for the job. You must at least have a University degree at masters level. Properties: Analytical mind, enthusiastic team player, good communicator. We offer a challenging job with good terms of work and enthusiastic colleagues. Language skills: Our software product and development requires good knowledge of the English language. Because of the Dutch location and colleagues, the candidate must be motivated to learn Dutch. Language skills of German, Spanish or French are

welcome but not required. **Controllab Products B.V.** Information: Kleijn C Christian Address: Hengelosestraat 705
Phone: 0534836434 Email: info@controllab.nl

All-round, creative, building co-worker

All-round, because in this compact office you will be doing all kinds of (errand) work, from serving coffee and vacuum cleaning, till designing and detailing projects. Creative, because we ask a design solving attitude. Building, because it means you know, what is called for, to participate in the building process and to get something actually executed. And finally you have to be all-round in the sense that you comprehend, how complex it is to arrive at a buildable, adequate and 'fresh¿ design solution. You will need to have high skills in building and architecture/design, with knowledge of building techniques, but also of social interaction, necessary in a commercial, service oriented company. Equivalent of HTS (NL: Polytechnic school) and TU (NL: University of Technology), both in architecture 5 years, preferably in a compact office environment and with a high level of autonomy in responsibility and nature of work. We like to stress, that as a compact office, offering a wide range of architectural services, we demand of a candidate to be: highly skilled, versatile and service oriented (internal and external). Having worked in a similar environment will be highly valued!

Research Associate in Regenerative Medicine

LINKÖPING UNIVERSITY/The Faculty of Health Sciences Hereby advertises a position as Research Associate in Regenerative Medicine, with focus upon Biomaterials Research formally based at the Department of Clinical and Experimental Medicine. Subject area: Regenerative Medicine, with focus upon Biomaterials Research. Description of subject area: Regenerative medicine has as its main goal to completely or partly replace damaged and/or degenerated parts of the human body. The substitute material can be composed of cells, tissues, protein structures or foreign material, or combinations of these four. This area is currently in a very expansive phase, and major progress is made both with respect to endogenous cells/tissues and foreign materials i.e. biomaterials. The subject area of Biomaterials involves the development of novel soft materials for tissue engineering and regenerative medicine. The subject area involves macromolecular chemistry, biopolymers, biomimetic materials, responsive hydrogels and organic synthetic chemistry, and/or systems for controlled drug delivery. Duties: This position involves research, teaching and administrative duties. It is also the responsibility of the holder of the position to follow the development within one's own research area as well as societal developments relevant to the research and teaching. The holder of the appointment as Research associate shall mainly conduct research but also participate in teaching on the undergraduate and advanced levels at Linköping University. The pedagogic approach of the Faculty of Health Sciences stresses learner-driven education. The primary duties involves developing an independent research program, as well as participating in team-based multi-disciplinary projects together with stem cell biologists, nano-technologists, engineers and surgeons to develop translational bio-therapies within vision, nerve or cardiovascular regeneration. Thus, experience of macromolecular chemistry, organic and polymer-chemistry is a plus. Similarly, experience in hydrogel development for application within the research areas of stem cell and regenerative medicine, as well as in GMP processes for clinical applications or clinical trials constitutes a major asset. Qualifications: The position requires a doctorate or an equivalent degree from a foreign university. Candidates with a doctorate obtained no longer than five years before the expiration date of the application will be considered first. A more detailed description of the position at <http://www.liu.se/en/job/> / Application procedure: Your application marked with the Registration number LiU-2010-00435, accompanied by your Curriculum Vitae (please use the template <http://www.liu.se/en/job/> /), list of publications, and other documents you may wish to refer to, must reach the University Registrar no later than 2010-07-02 at the following addresses: e-mail: registrator@liu.se or Linköpings Universitet, Registrator, SE-581 83 Linköping, SWEDEN. Documents that are sent electronically (application, CV, and list of publications) shall be in MS Word or pdf. The scientific work to be taken into consideration (four copies) of which one set is sent to the Registrar together with the documents. The other three sets shall be divided and numbered in three parcels and kept by the applicant and after instruction from the Secretary of the Appointment Advisory Board forwarded to the specialist group in the Appointment Advisory Board. Late applications will not be considered.

Senior Research Engineer in Soil Mechanics/Foundation Engineering

Senior Research Engineer in Soil Mechanics and Foundation Engineering, ref 1031-10. The Division of Mining and Geotechnical Engineering within the Department of Civil, Mining and Environmental Engineering at LTU has research groups in soil mechanics, and rock engineering and rock mechanics. Soil mechanics deals with the mechanics of granular masses and their use in various structures. Dredging in harbours and waterways for continued increased use of marine transport as an efficient and environmentally smart means of transport involves handling large amounts of soil-like dredged materials. Much of the dredged sediment is more or less contaminated. In order to handle this type of sediment safely and sustainably in the long term, methods are now being developed to stabilise the sediments and to enable their use in harbour structures. LTU is working on these methods with several collaborators, including harbours and research institutes from countries bordering the Baltic Sea. This collaborative effort falls within the framework of a project called SMOCS, which is financed by the EU. We are looking for a senior research engineer to work with us on this project. The position is temporary for a maximum of two years from start date. Duties: Principal duties include working within the framework of the SMOCS project with issues involving long-term environmental impact on surrounding land areas and water environments from stabilised dredged sediment when used in earthen structures. Duties also include participating in efforts to transfer knowledge and information on the stabilisation technique to harbours, authorities and researchers within the framework of the SMOCS project. The work involves visits to project participants and test sites. Reporting and presenting results is an important duty and publication in international forums is essential. The position entails a relatively large amount of travelling, mainly around the Baltic Sea. Some supervision of master's students is required. Essential duties include contact with project participants and communication of results internally and externally. Qualifications: To qualify as a senior research engineer, you must have an undergraduate degree or equivalent scholarly expertise or have some other significant proficiency in the stated subject content and tasks. Good speaking and writing skills in Swedish and English are required. Good interpersonal skills, experience with formulating project applications for research programs and preparing project plans together with industrial organisations are assets. Experience with project management. Experience holding leadership positions is an asset. Ability to present material in front of large groups is an asset. Start date is negotiable. Information is available from Professor Sven Knutsson on +46 920 49 13 32 or sven.knutsson@ltu.se . Wages according to collective agreement with trade union. Union representatives can be reached via the university's switchboard on +46 920 491000. Send application to: Luleå

University of Technology, Registrar, SE-971 87 Luleå, Sweden. You can also send your application electronically to registrator@tu.se. Reference number: Please specify reference number 1031-10 in your application.

Información del Graduate Teacher Programme:

<http://www.britishcouncil.org/learning-graduate-teacher-programme.htm>

CILT, the National Centre for Languages recruits native speakers of French, Spanish and German to train to become qualified teachers of languages in schools in England. The Graduate Teacher Programme (GTP) is a unique and innovative teacher training initiative for modern languages.The Graduate Teacher Programme is an employment-based initiative which enables graduates to train and qualify as teachers while they work in a secondary school (pupils aged 11-16) in England. 'On-the-job' training is carried out over the course of one academic year and is combined with professional duties in the school.

The CILT GTP is unique because it is the only GTP in England which solely recruits native speakers of French, Spanish and German, providing a training course specifically designed to meet their needs.

At the end of the Graduate Teacher Programme training year, successful trainees gain Qualified Teacher Status (QTS). This enables you to apply for work as a Newly Qualified Teacher (NQT) in England or Wales. It will not enable you to work as a qualified teacher in most other European Union countries.

BECAS ARGO GLOBAL

La convocatoria del programa **ARGO GLOBAL** tiene una duración de tres años, iniciándose en diciembre de 2009 y siendo la fecha límite para la finalización y el retorno de los becarios el 30 de junio de 2012.
